

## **Ecclesiastes Sonnet in a Time of Climate Change**

*Craig Santos Perez*

There is a time everything changes,  
and an impact from every footprint on the planet:  
a time for air pollution and a time for blue skies,  
a time for heatwave and a time for arctic vortex,  
a time for melting glaciers and a time for rising seas,  
a time for infectious disease and a time for vaccine,  
a time for GMOs and a time for seed vaults,  
a time for mitigation and a time for mass migration,  
a time for climate negotiation and a time for civic protest,  
a time for austerity and a time to occupy Wall Street,  
a time for survival plans and a time for extinction,  
a time for fossil fuels and a time for renewable energy,  
a time for despair and a time for resilience,  
a time to drown and a time to fight.
